

Join Our Independent Study On Bioidentical Hormone Replacement Therapy

MARK TAYLOR, RPH

Jersey Shore Pharmacy in Egg Harbor Township, NJ is now conducting an independent research study on bioidentical hormone therapy.

Pharmacist Mark Taylor, RPh and Arpita Sammons, PharmD will be investigating the efficacy of a combination of bioidentical hormones in relieving menopausal symptoms.

Over the past decade the use of hormones for menopausal women has been controversial. Though bioidentical hormones have been around for years, most practitioners are unfamiliar with them. There are several branded versions now available for use in the kind of hormone replacement therapy (HRT) typical of synthetic hormones. This is generally a one-size-fits-all dosage. Custom compounded "bioidentical" hormone replacement therapy is an option that should be discussed with your physician for the relief of menopausal symptoms such as hot flashes, mood swings, night sweats, low libido and weight gain.

Healthy peri-menopausal and menopausal women currently experiencing moderate to severe menopausal symptoms at any age can qualify to participate in this 3 month research study.

The 3 month clinical research study will include at NO COST TO THE PATIENT:

- **Initial consultation:** Our detailed patient questionnaire allows us to provide a detailed assessment of midlife concern, symptoms, lifestyle and wellness. The advantages, disadvantages, dosing and effectiveness of various therapies are identified and assessed. Patient lifestyle and personal preferences are considered to develop the best program for each patient's needs.
- **Support during your therapy.** We are here to answer any of your questions at any time.

- **Three months of Bio-Identical Hormone Replacement Therapy supplements** at no charge. This would be compounded hormone replacement therapy as prescribed by your physician.
- **Two follow up phone consultations** to monitor compliance, symptoms and answer any additional questions.

All candidates must be new to hormone replacement therapy since we are studying how this therapy helps alleviate menopausal symptoms. Once your physician prescribes the therapy that is best for you, please contact us so that we may enroll you in the study. Jersey Shore Pharmacy (located in Egg Harbor Township, NJ) maintains the confidentiality of trial participants including their personal identity and all personal medical information. Results of the study will be published as the data becomes available.

Please contact us at **609-927-8900** or at jerseyshorepharmacy@earthlink.net with any questions. *"We have everything you need for a healthier tomorrow."*

Jersey Shore Pharmacy SAVES YOU MONEY

3 WAYS TO SAVE . . .

- ❖ Get a 90 day supply of over 300 generic medications for only \$11.00!
- ❖ If you are a NEW CUSTOMER to us, just mention this ad and receive a free gift.
- ❖ Transferring your prescriptions is easy ... just bring us your bottles and mention this ad and you will receive a **\$10.00 gift certificate** for you to use on anything in the store.

COMPOUNDING PHARMACY

Restoring Hormone Balance

Women have questions! We have answers!

Interest in Customized Hormone Replacement Therapy surged after Oprah's recent guests, including doctors Christiane Northrup and Prudence Hall, discussed the science behind customized HRT. Dr. Phil's wife Robin McGraw described how through extensive research and with the help of a compounding pharmacist and her physician, she found natural ways to battle menopausal symptoms and turned the "change of life" into a positive experience.

For more information on customized hormones, or to schedule a private consultation, call our professional compounding pharmacy.
